## Fencing Fox software

Fencing Fox is a new fencing competition software, robust and flexible. It allows all kinds of formulas, even tricky ones, for instance poules larger than 11, repechages, fenced places, barrages, Italian relays ...

It has received the **FIE final homologation** in June 2018, after receiving the theoretical homologation in July 2016. It has been tested in simulation by 2 international referees for more than 30 hours in total. Outside of these tests, it has been used in numerous competitions a French youth national competition, a World cup in Legnano, many IWAS international competitions, Championnat de France Foil U17 2019 in Narbonne, National Circuit Epee Senior 2019 in Nimes, National Circuit epee women in Soissons 2022, etc.

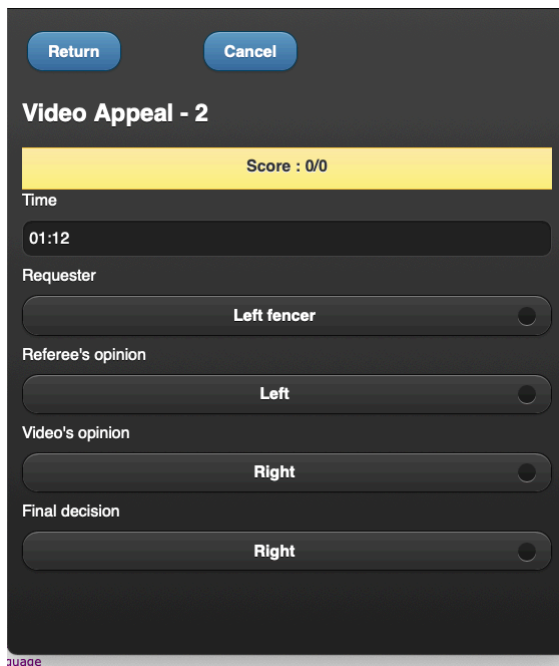

## Robust and flexible

Automatic backups every 5 mins on a USB key as well as backtracks on errors or wrong parameters insure a hassle-free competition even in the worst conditions. Offering no single point of failure in contrary to software relying on databases, it provides yet synchronization primitives for collaborative work.

It comes now with a new server version which allows synchronization of several computers in real time.

## Up to date

Fencing Fox has been part of the FIE working group on XML results standards, and is part of the testing group for the 2019-2020 FIE web site. It integrates the latest rules for fencer exceptional status, team replacement, video statistics, etc.

## User friendly

The software is easy to use, using drag and drop and contextual menus. Poule score entering has been accelerated, and fenced places can be added or removed dynamically, as well as derived competitions. It is possible to add or remove fencers, modify the order of matches, etc.

## Smartphone real time results

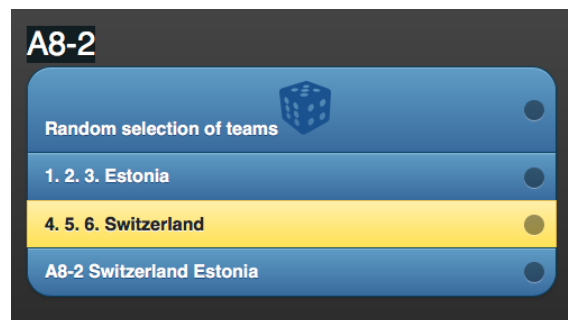

Fencing Fox also allows entering results using a smartphone for a real time ultimate experience, including cards, priorities and a small chrono.

Smartphone connection uses a simple wifi hub, and no external access to Internet or Internet subscription is necessary.

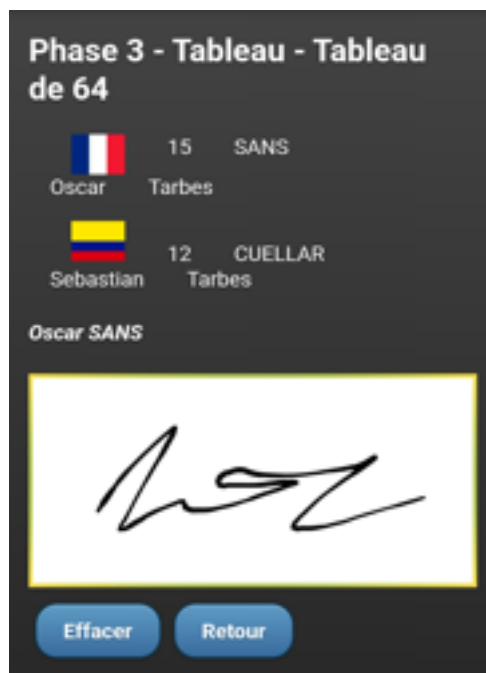

The web app also allows display a passivity chrono, a medical chrono, pcards, video statistics.

This very handy for team competitions to enter team order next to the piste.

## Electronic signature

The web app also allows digital signature, sparing a vast amount of paper. Each signed document is stored in central with versioning, allowing double checking. The software does not store individual signatures.

## Connected scoring machines

Fencing Fox can be used with all connected machines in the market (SG, Favero, Allstar). It has been using up to 10 simultaneous connected machines in competition, or with machines from different constructors at the same time. It implements the newest Cyrano 1.1 FIE protocol, allowing handling of pcards and 1/100<sup>th</sup> display.

## New in 2022

An experimental feature allows to publish in real time (<10ms) on web the score information from scoring machines, including score, chrono, lights and cards.

## Customize your display

Fencing Fox can offer versatile displays by providing a programming and scripting GUI interface to display as many as 15 different screens (participants, poules, tableau, schedules, referees ...) with customizable color layouts and display times. It can handle several screens and split screens to display multiple information.

The display application can run on cheap computers such as Raspberry Pis, allowing many screens connection through wifis around the premises.

	1	2	3	4	5	6	7	VMA	Points	TA
EL HAFIA Amira Hayet	3	V	V	2	V	V	V	0.667	13	25
MARTINEZ Yuelvis	V	V	1	V	V	4	V	0.667	7	25
BARTH Julia	0	V	0	3	V	4	V	0.333	-6	17
CROISSET Lisa	0	0	V	0	3	V	V	0.500	-2	18
SICILIANO Isadora	V	3	V	V	V	V	3	0.667	4	28
CROVARI Chiara	2	V	1	3	4	V	V	0.333	-8	20
BASHTA Anna	0	2	V	2	V	4	V	0.333	-9	18

With smart phones or connected machines, the display can sync the results within less than one second delay.

## Server version

Fencing Fox has a server version which allows collaborative work by storing data in a database hit by hit in real time. Located in the cloud, the database can synchronize remote sites or score entry shared on several computers.

## Treat your sponsors

Fencing Fox generates color PDF files, which can be customized to display

## Optional services

Fencing Fox can connect to an international SMS platform to send automatically to fencers and referee messages with time and piste. It can also be used to send individual messages such as doctor call.
